DETAILS INCLUDE

Encompass 360 provides a very strong engine for your business management of the loan process. In addition, through the Software Developers Kit (SDK) it provides a user friendly programming interface that allows for integration into other software programs. These custom integrations provide for a seamless data exchange between systems along with the ability to build business riles to ensure data integrityy. Each company is different and Matchbox streamlines the ability to customize the Encompass system to fit your business model. Matchbox is well versed in SDK development and can help you get more out of your current process with custom integration packages.

With Encompass 360 as your database of record, all facets of your business can integrate within one system.

The path of your business comes down to decisions on which path to take.
