## Encompass 18.2.0.4 Server Patch 2 Release Notes

This Service Pack includes updates to users' Encompass client machines and a Server Patch that is applied to the Encompass Server.

### Encompass Release Naming and Timing

Portions of this release will be applied automatically to user's computers. The client-side update can be controlled manually via the Encompass Version manger tool. Users will receive an update upon login following the release. Server patch will be applied automatically to the Encompass Server and cannot be controlled manually.

### System Requirements & SDK Upgrade Requirements for Encompass

It is recommended, but not required, that you upgrade to the latest SDK delivered with this update to ensure the same functionality as in the latest version of Encompass is also available in your SDK.

Please refer to detailed Encompass Release Notes as provided by Ellie Mae for details on SDK upgrading and automation.

### Admin Action

SDK install files will be available on the [Encompass SDK Install Files](#) page.

## Fixed Issues for Version 18.2.0.4

### Encompass Forms and Tools

#### APR and Total Interest Percentage Can Now be Manually Updated

- Fields 799 and LE3.X16 are now functioning as intended when the Lock icon is clicked.

#### Correct Score for Decision Making Drop Down Fields Functioning Correctly

- Credit score for decision making drop down fields were not populating when the Loan Status was set to application withdrawn, file closed for incompleteness, or preapproval request denied.
  - Resolved and working as intended. You may need to select more than once to get the drop downs to appear.

#### Validation failing when attempting to Import a Business Rule from a different Encompass Environment

- This issue has been resolved and the associated error message is no longer firing.

#### TPO Actions Condition Options not displaying correctly

- Business rule set up corrected so that the appropriate conditions can be selected in order the business rule to trigger.
- This is corrected for Persona Access to Fields, Fields Data Entry, Persona Access to Loans and Persona Access to Loan actions business rule settings.

#### Custom Input Forms Not Being Included in Input Form Set Templates

- The forms were not sustaining in the input from set after configuring, saving and returning to the template.
- This is now resolved and the input form sets are behaving as intended.

#### Newly Added Title Fees Being Retained in Title Fee Tables

- Issue occurred when configuring tables of title fees that the data was not sustaining upon exit of the table configuration.
- This is now resolved and the title fee tables are retaining entry as expected.
